5/25/90

Dear Jim,

This is or includes what I was to have gotten in C.A. 78-0322 and repeatedly asked for during the suit and after it.

Before I write an indignant letter to Huff, I call it to your attention and would like to know what you think.

I believe that this Dictabelt is what the FBI gave the NAS/Ramsey committee and that we need not assume that it is the original, although it might be.

The appeal on which they did nothing is a decade old!

Without knowing what they transferred I can be certain how much of it was within the combined field-offices suit but I'm sure more than the beat is.

So, first of all, can I get the inventory and the covering letter without filing a new request for them? This would let us know what they gave the Archives.

I do think that this should interest Congress/FOIA- doing nothing for a decade and then dumping it elsewhere where the relevance is clear in this letter from Huff.

Best,

Harold
